

WOMAN - KIDS

- 1 Use a sheet of A4 paper to print out the foot sizing chart, unflag the "Adapt to page" option or flag "Customised scale 100%" so that the sheet is printed using the correct measurements.
- 2 Stand upright making sure your heel, or that of your child, is on the dotted line.
- 3 Position your foot in line with the drawn footprint, making sure it is nice and flat on the sheet of paper. Now use a pen or marker (as long as it leaves a clear outline) to draw around the foot and measure the footprint with a ruler.
- 4 Compare the measurements to those in the table and you will then know which size is right for you or your child!

MAN

DID YOU USE THE CORRECT PRINT SETTINGS?

To check you printed the foot sizing chart in full scale (100%, with no 'adapt to page' options), use a ruler to measure the scale at the top which must be 5 cm.

- 1 Use a sheet of A4 paper to print out the foot sizing chart, unflag the "Adapt to page" option or flag "Customised scale 100%" so that the sheet is printed using the correct measurements.
- 2 Stand upright making sure your heel, or that of your child, is on the dotted line.
- 3 Position your foot in line with the drawn footprint, making sure it is nice and flat on the sheet of paper. Now use a pen or marker (as long as it leaves a clear outline) to draw around the foot and measure the footprint with a ruler.
- 4 Compare the measurements to those in the table and you will then know which size is right for you or your child!
